ABSTRACT

The Division of Indian Education of the Arizona Department of Education distributes Federal funds under the Johnson-O'Malley Act. These funds are provided to public schools and counties in Arizona with 3% or more American Indian children to help pay the cost of educating Indian children living on tax-exempt reservation lands. The host school district receives the full per capita cost of education in the case of out-of-district Indian children living in Federal dormitories. During the school year 1971-72, funds were provided to 20 school districts, 1 accommodation school, and 9 counties for administrative and supervisory services, special programs, and inservice training for Indian teachers. This report contains the annual report by the Division of Indian Education for the fiscal year ending June 30, 1972, as submitted to the Bureau of Indian Affairs. Statistical data is reported on the following: (1) receipts and expenditures of contract funds; (2) peripheral contract payments; (3) expenditures for State administration; (4) allotment and expenditures by districts; (5) enrollment, average daily attendance, and graduates by school; and (6) tax rates and assessed valuation by districts. The report also includes summary reports on elementary and high school Indian enrollment of Johnson-O'Malley participants. (NQ)

Mr. John H. Artichoker, Area Director
Phoenix Area Office
Bureau of Indian Affairs
124 West Thomas Road
Phoenix, Arizona

Dear Mr. Artichoker:

It is a pleasure to submit to you this report of the Division of Indian Education for the fiscal year ending June 30, 1972.

We in the Department of Education believe that the Johnson-O'Malley Act is one of the finest programs operating in the area of fiscal assistance to local school districts. Educators and interested lay people alike are very gratified by the advances in this area of education that have been made since its implementation.

With the advent of even more changes in public education, a situation which is destined to continue, the Johnson-O'Malley Act will, I am certain, continue to serve as a strong and effective weapon to lessen the educational gap between Indian youths attending reservation schools and those attending our urban institutions.

It is my sincere hope that the Bureau of Indian Affairs will find this report as worthy of praise as I believe it to be.

Also, I would like to express, on behalf of the State Board of Education, my deep appreciation to your office for its help in maintaining the cooperative spirit which guides this program.

Sincerely,

W. P. Shofstall, Ph.D.,
State Superintendent of Public Instruction

NARRATIVE

1971-72 ANNUAL REPORT ON INDIAN EDUCATION IN ARIZONA

Distribution of federal funds under the Johnson-O'Malley Act (P. L. 73-167) is made by the Division of Indian Education of the Arizona Department of Education. Funds are provided to eligible public schools and counties (with an impact of 3% or more eligible Indian children) of Arizona to help pay the cost of educating Indian children residing on tax-exempt reservation lands. Full per capita cost of education of out-of-district Indian children housed in federal dormitories is provided to the host school district. The basis of the contract between the Bureau of Indian Affairs and the Arizona State Board of Education is a State Plan developed by these agencies representing the Federal Government and the State of Arizona.

Under the State Plan, $4,768,126.26 was provided to 20 school districts, 1 accommodation school, 9 counties and for administrative and supervisory services during the school year 1971-1972. Funds for special programs and inservice training for Indian teachers are included in the above amount. Approximately 17,613 students were enrolled in regular participating schools, and 1,098 students were enrolled under the Peripheral Dormitory Program.

The Program Director visited the Johnson-O'Malley schools during the past year, reviewing the computations of entitlements with the local school administrator. In cases where my help was requested, I assisted the schools in estimating the Johnson-O'Malley entitlements.

Respectfully submitted,

E. L. TURNER, JR.
Program Director

ANNUAL REPORT OF PROGRAM CONSULTANT

Mamie Sizemore

1971-1972

> It is well known that educational change is not synonymous with improvement; on the other hand, improvements are not possible without change.

The most troublesome question facing parents and educators of Indian students in our rapidly changing world is whether the education children are experiencing today is adequate to meet the challenges of the future. Assessing the needs of particular students and evaluating how well particular schools are meeting these needs are essential activities if quality education is to be assured.

In the past the criteria most often associated with school evaluation have been quantitative in design, such as: the number of books per student in the library, the audio-visual equipment available, the teacher-pupil ratio, etc. These conditions may or may not reflect the quality of the educational program. Their particular attainment is no guarantee that the educational needs of children are being met.

During the 1971-1972 school year, the schools have used a method which focuses attention on the quality of their educational programs. Representatives of the community (advisory boards) have been involved in helping individual school staffs in identifying educational goals for particular students and translating these goals into relevant programs. This evaluation criteria was generated from within the structure of each school and was not imposed from the outside. This enabled the local schools to evaluate existing programs against identified needs. The evaluation model identified strengths and weaknesses and enabled the staff of each school to revise programs by on-the-job, do-it-yourself skills.

Following are some of the conclusions reported to the consultant:

1. Increasing the amount of money available to a district did not guarantee improved learning. Other factors were often found to be more significant.

2. Experts in curriculum were frequently found in the classrooms.

3. Inservice workshops were found to be a necessary ingredient of any system of accountability.

4. Taking too big a bite proved to be a problem; e.g., trying to evaluate too many areas in one year.

5. Procedures in setting priorities became too complicated in several schools.

6. Measuring devices used were found to be imperfect. This was particularly true in the affective domain.

7. Shift in the role of teachers from purveyors of information to a more professional role.

8. Administrators in becoming learning facilitators asked and helped their staffs answer the following questions:

    (a) What are our problems?

    (b) What are our objectives?

    (c) What criterion measures have we decided to accept?

    (d) What are the steps in our learning strategies?

    (e) What materials do we need?

    (f) What are our results?

    (g) What changes are required?

All of the above commitment to accountability should produce educational programs for individual students in public schools on Arizona Indian reservations.

Routine duties consisted of the following activities:

1. All major impact schools were visited.

2. Inservice workshops were held at San Carlos and Whiteriver.

3. Two workshops, each of which were two weeks' long, were held on Northern Arizona University campus.

4. Represented division on educational committees.

5. Prepared and distributed: Arizona Indian Tribes: Historical Notes; and Perceptual Training as an Integral Part of Kindergarten Practice.

6. Provided consultant service on request.

7. Addressed groups and organizations interested in education of Indian students.

8. Helped plan project to train school trustees.

9. Aided with teacher orientation sessions.

10. Contacted Indian parents in each community visited.
